10th Brazil Germany Symposium for Sustainable Development

***Connecting innovation and sustainability -
opportunities and challenges after Covid-19***

Niteroi - Rio de Janeiro | September 18-20, 2022

CONNECTING INNOVATION AND SUSTAINABILITY - OPPORTUNITIES AND CHALLENGES AFTER COVID-19

The 10th Brazil Germany Symposium for Sustainable Development will occur on September 18-20, 2022, in the City of Niteroi, RJ, Brazil, at the Fluminense Federal University (UFF). The UFF, the Federal University of Rio de Janeiro (UFRJ), and the Brasilien-Zentrum of Baden-Württemberg at the University of Tübingen, Germany, are in charge of the Symposium organization.

The tenth edition of the German-Brazilian Symposium on Sustainable Development, with the central theme "Connecting innovation and sustainability - opportunities and challenges after Covid-19", aims to be a platform for inter and transdisciplinary exchange and debate with a focus on innovation for sustainability, in particular towards the reflections, opportunities and challenges for sustainable development after Covid-19.

Very often the key components of sustainability such as energy, water, soil, climate, biodiversity, agriculture and forestry, health, societal actions and response and bioeconomy, are analyzed and managed separately. The scope of the Brazil-Germany Symposium of Sustainable Development is to bring together researchers not only from the two countries and different life and research experiences, but also from different areas enhancing inter and transdisciplinary approaches and, thus, maximize the benefits of integrated concepts and solutions.

FEATURED SPEAKERS

Emmanuel Zagury Tourinho
Federal University of Pará
